

# ITALIAN RYEGRASS

## JACKPOT (DIPLOID)

### OVERVIEW

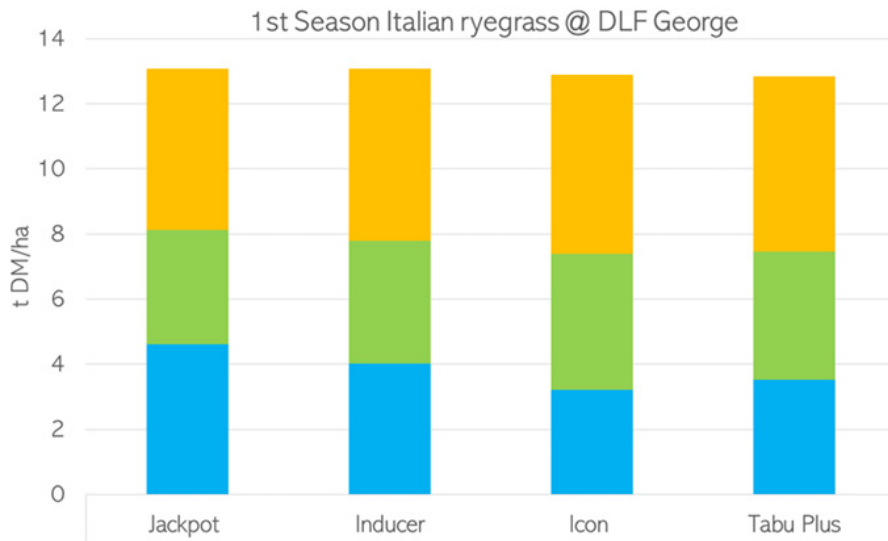

JACKPOT is a new diploid Italian ryegrass bred by DLF Seeds in New Zealand. The breeding and testing programme aimed to develop a new fine-leaved cultivar with improved production in all seasons, and the ability to produce for two or more years in favourable climates.

Testing has confirmed that JACKPOT is a leading cultivar for production and survival. Its late heading date also prolongs feed quality in spring.

- Excellent yield
- Excellent Winter growth
- Excellent early Spring growth
- Diploid Italian Ryegrass

Mean annual yield of diploid Italian ryegrasses over three years.  
Kaiwera Pasture Trail Site (2012 - 2015)
