## BETCHUANA WHITE

### OVERVIEW

Betchuana White is a summer growing annual. It has an upright growth habit making the harvesting easier than the runner types. Betchuana White is used for grain/hay and silage. It combines well with maize, sorghum and millet.

The grain colour is white when freshly harvested. Grown in hot conditions, moderate acid soils and low fertility. It will not grow in wet soils as it is cold sensitive and doesn't like high humidity. Plant in Nov/Dec for hay and Dec/Jan for grain.

- Upright growth habit
- Grain, hay and silage
- White grain colour when freshly harvested
- Grown in hot and dry conditions

# AKKERBONE

## BETCHUANA WIT

### OORSIG

Betchuana Wit is 'n eenjarige somer peulgewas. Dit het 'n semi-regop groeiwyse wat die oes makliker maak. Betchuana Wit word gebruik vir graan / hooi en kuilvoer. Dit kombineer goed met mielies, sorghum en manna.

Die graankleur is wit wanneer dit vars ge-oes word. Kan geplant word in warm toestande, matige suur gronde en lae grondvrugbaarheid. Akkerbone word nie aanbeveel vir nat en koue toestande nie. Plant in Nov/ Des vir hooi en Des/ Jan vir graan .

- Semi - regop groeiwyse
- Graan, hooi en kuilvoer
- Wit graankleur wanneer dit vars ge-oes word
- Plant in warm en droë toestande.
