

# YELLOW HYBRID MAIZE

## CAP 95-22

EARLY

MEDIUM

### Excellent silage or grain crop

CAP 95-22 is a medium maturity, prolific hybrid. This hybrid has long cylindrical cobs with a semi dent grain. The hybrid has large plants.

Our yellow hybrid, CAP 95-22 can give high grain yields of up to 15mt/ha when planted under high population density of between 60 000 - 70 000 plants per hectare making a suitable variety in higher potential areas under irrigation.

It is also suitable for low potential areas under low plant populations due to its' prolificacy.

This hybrid has reasonably good tolerance to diseases. It responds well to fertilizer in high potential areas of the main farming regions of South Africa. CAP 95-22 is also an excellent silage variety.

CAP 95-22 is 120 - 130 days until physiologically maturity in the warmer areas and 134 days in the cooler areas.

Trials yield per hectare:

- 7.5 tonnes of dry land with a 45 000 PS
- 11.5 tons of irrigation up to 80,000 PS

### Recommended for regions:

- 1 - Western Regions
- 2 - Temperate Eastern Regions
- 3 - Cold Eastern Region
- 4 - KwaZulu Natal Region

- Responds well to fertilizers, irrigation and fairly high pop. density
- High disease resistance
- Tolerant to Stalk Rot and lodging
- Susceptible to Grey leaf spot, rust and H.T. Please follow a good spray program
- Yield potential of up to 12 MT/ha
- Good drought tolerance
