

HYBRID GRAIN SORGHUM

ARROW - EARLY MATURING

SWEET RED, LOW TANNIN

ARROW is an early maturing hybrid grain sorghum with excellent yield potential. ARROW has a semi-open head type and excellent hybrid vigour.

Performance

ARROW displays medium lodging resistance and has an attractive red grain colour. ARROW adapts well across most environments and systems. It is suitable for both dryland and irrigated production.

ARROW has good disease resistances and a provisional midge rating of 4.

Tolerant to stress across most environments.

- Dryland marginal: 30-50,000 Plant Population
- Dryland good: 50-75,000 Plant Population
- Irrigation: 90-140,000 Plant Population

Kind	Hybrid
+/- Days to flowering - Spring planting	67-70
+/- Days to flowering - Summer planting	61-67
Seed Colour	Red
Semi	Open head type
Grain Size	medium/large
Tillering habit	Medium
Maturity	Early
Lodging Resistance	Medium
Provisional Midge Rating	4
Disease Resistance	Good

*1 = Excellent
9=Poor
