

# HYBRID FORAGE SORGHUM

## MULTIGRAZE

### SUDAN GRASS X FORAGE SORGHUM HYBRID

MULTIGRAZE can be used for grazing, hay, silage or green chop and is excellent for dry matter production with a high protein and energy content.

MULTIGRAZE does not grow as fast as Multicut but grows taller. It's leaves will also stay greener for longer and will yield higher per hectare than Multicut.

### PLANTING

MULTIGRAZE must be planted once the soil temperature reaches 16°C at 9am and are rising at the sowing depth.

- Grazing within 3-6 weeks of planting
- Disease and drought resistant
- High tonnages with superb feed values
- Uses: grazed, hay, silage or fed as green chop

Our farmers are serious about farming.  
We're serious about seed.
