

OATS

TARGET

OVERVIEW

TARGET is a tall, medium maturing, older hay variety. TARGET has a preferred rainfall of 350mm+ and a preferred pH level of 5-8.

TARGET is compatible with most soil types and is usually sown with a sowing rate of 60-120 kg/ha (pure). Target has a good straw strength with medium height.

TARGET is a dual purpose oat that has good grain quality and can be grazed if the season allows. It has an intermediate resistance to Septoria but a susceptibility to stem and Leaf Rust.

- Rainfall - 350mm+
- pH - 5-8
- Medium maturity
- Sowing rate of 60-120 kg/ha (pure)
