

# HYBRID GRAIN SORGHUM

## CAP 1005

### Red Sorghum, Low Tannin

CAP 1005 is a hybrid grain sorghum with very good uniformity and threshability.

On average CAP 1005 takes approximately 80-85 days to reach 50% flower, and can be harvested after 140-145 approximately. This variety can reach heights of up to 155cm at maturity.

Notably CAP 1005 has good stand-ability, head-smut tolerance and leaf disease and stem rots tolerance.

CAP 1005 makes for an all-round great sorghum for both silage and grain.

- Very high stand-ability
- Great threshability
- Red seed colour
- GM grading

Kind	Hybrid
+/- Days to 50% flower	80-85
+/- Days to harvest	140-145
Plant Height	155cm
Uniformity	2*
Stand-ability	3*
Threshability	2*
Head-smut Tolerance	3*
Leaf disease and stem rots	3*
Ear Type	Half Open
Grading	GM
Seed Colour	Red

\*1 = Excellent  
9=Poor
